About Me

I am a fourth-year student in the field of Algorithmic Informatics. One of my interests is exploring the intricacies of computer science, hence my proficiency in many programming languages. During my studies, I developed a strong interest in low-level languages, along with the optimisation, memory, and safety management they involve. I quickly and eagerly learn new things.

I consider myself highly communicative, eager to collaborate and connect with new people, which enables me to work efficiently in a team.
